Company Announcements Office
ASX Limited
Level 4, 20 Bridge Street
SYDNEY NSW 2000

ACTIVITIES REPORT FOR THE QUARTER ENDED 30 JUNE 2017

During the quarter, exploration activity was restricted while Hampton Hill Mining NL (Hampton Hill or the Company) awaited the next drilling proposal for the Millennium Zinc Project held in joint venture with Encounter Resources Limited (Encounter), the project manager and majority owner.

The Company's other key assets are a holding of almost 10 million fully paid shares in Peel Mining Limited (Peel) and a 5% gross overriding royalty over all gold production in excess of 1 million ounces from the Apollo Hill Gold Project, where no work was carried out during the quarter.

Shareholders are referred to the current Peel ASX quarterly report for details of the progress that Peel is making with its substantial exploration activities centred in the Cobar district of NSW.

The Millennium Zinc Project

Hampton Hill is in the process of earning a 25% interest in this project by meeting \$2 million of the first \$3 million of joint venture expenditure (*HHM ASX release 23 April 2015 details the joint venture agreement*). The Company anticipates completing this earn-in during the next quarter.

The Millennium Project area incorporates Exploration Licences E45/2501, E45/2561 and the four eastern sub-blocks of E45/2500, which are a portion of the Encounter Yeneena Project (Figure 1).

Encounter, the project managers, report as follows:

The Millennium Project lies on the north eastern margin of Yeneena at the intersection of the NNW trending Tabletop Fault and the NE orientated Tangadee structural lineament. This intersection of two metallogenically important structural corridors is a first order target and typical of the style of setting that is associated with large scale metal deposits.

Previous aircore and RC drilling by Encounter has defined a +3 kilometre long zinc regolith anomaly that remains open to the SE. Diamond drilling at Millennium has intersected a thick zinc gossan at the contact between a brecciated carbonate and a thick sequence of carbonaceous shales of the Broadhurst Formation. Previous assay results from the gossan include (refer ASX release 9 July 2015).

38.7metres assaying 0.9% Zinc in drill hole EPT2201 from 255.8metres down hole; and 91.8metres assaying 1.6% Zinc in drill hole EPT2203 from 344.4metres down hole.

High tenor zinc sulphide mineralisation, in the form of sphalerite, has been intersected below the gossanous unit and returned assays of

0.7metres assaying 36.7% Zinc in drill hole EPT1854 from 430 metres down hole; and 7 metres assaying 4.8% Zinc in drill hole EPT2198 from 233 metres down hole.

(refer ASX releases 12 January 2015 and 13 December 2013):

Diamond drilling at Millennium has identified two distinct styles of zinc sulphide mineralisation, 'contact related' and 'shale hosted'. The presence of multiple styles of zinc mineralisation and the +3 kilometre long zinc footprint indicate a significant mineralising event at Millennium.

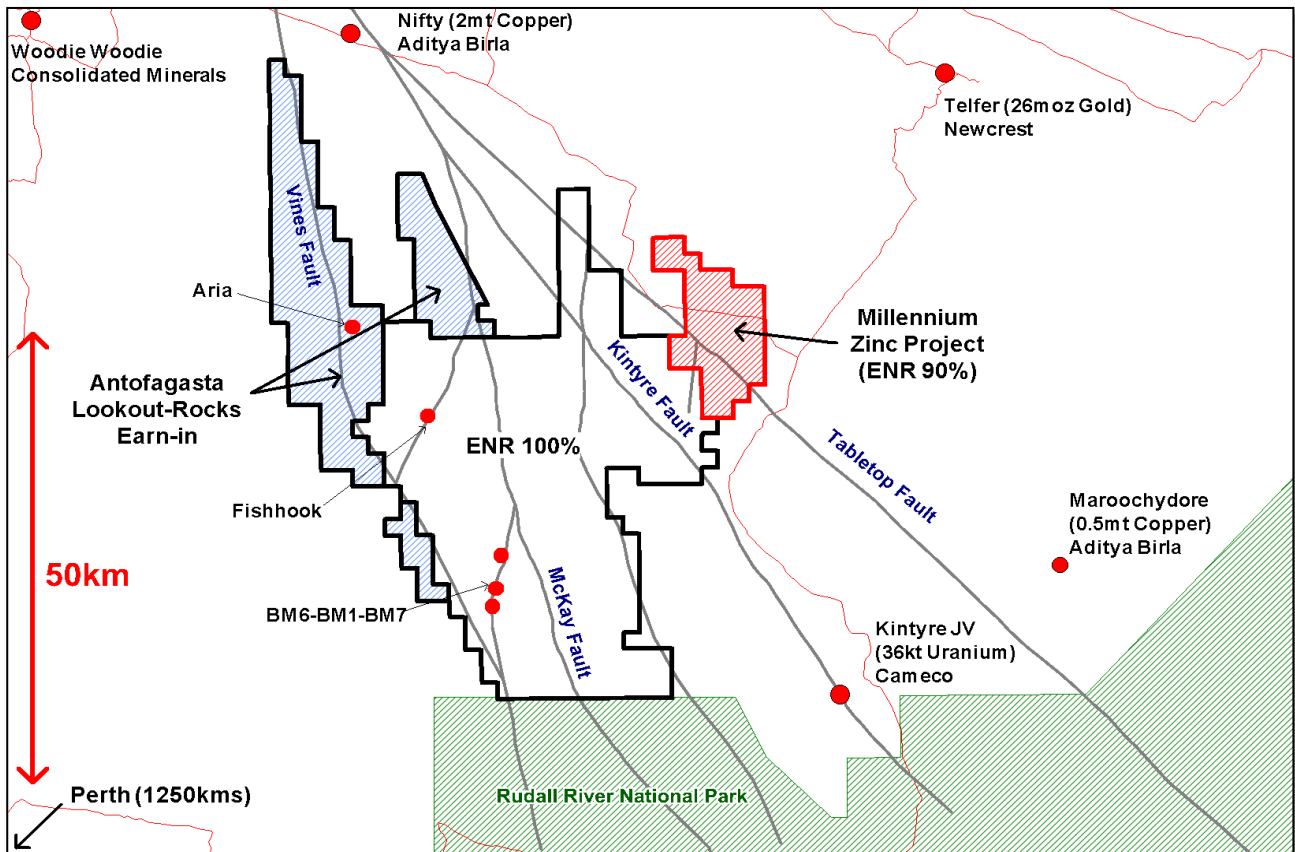

Figure 1: Encounter Resources Limited project map identifying the location of the Millennium Zinc Project

Next Steps

Drill hole EPT1854, which contained the high grade zinc intersection, is the most north-western drill hole at the project (see Figures 2 & 3). The area directly down dip and down plunge to the north-west remains open and potential exists in this area for additional high grade zinc sulphide mineralisation.

A diamond drill hole will be completed at Millennium in August 2017 targeting mineralisation along strike of EPT1854. In addition, if possible, EPT1854 will be re-entered and a wedge hole will be completed to intersect the interpreted high grade mineralized position approximately 40 metres down dip.

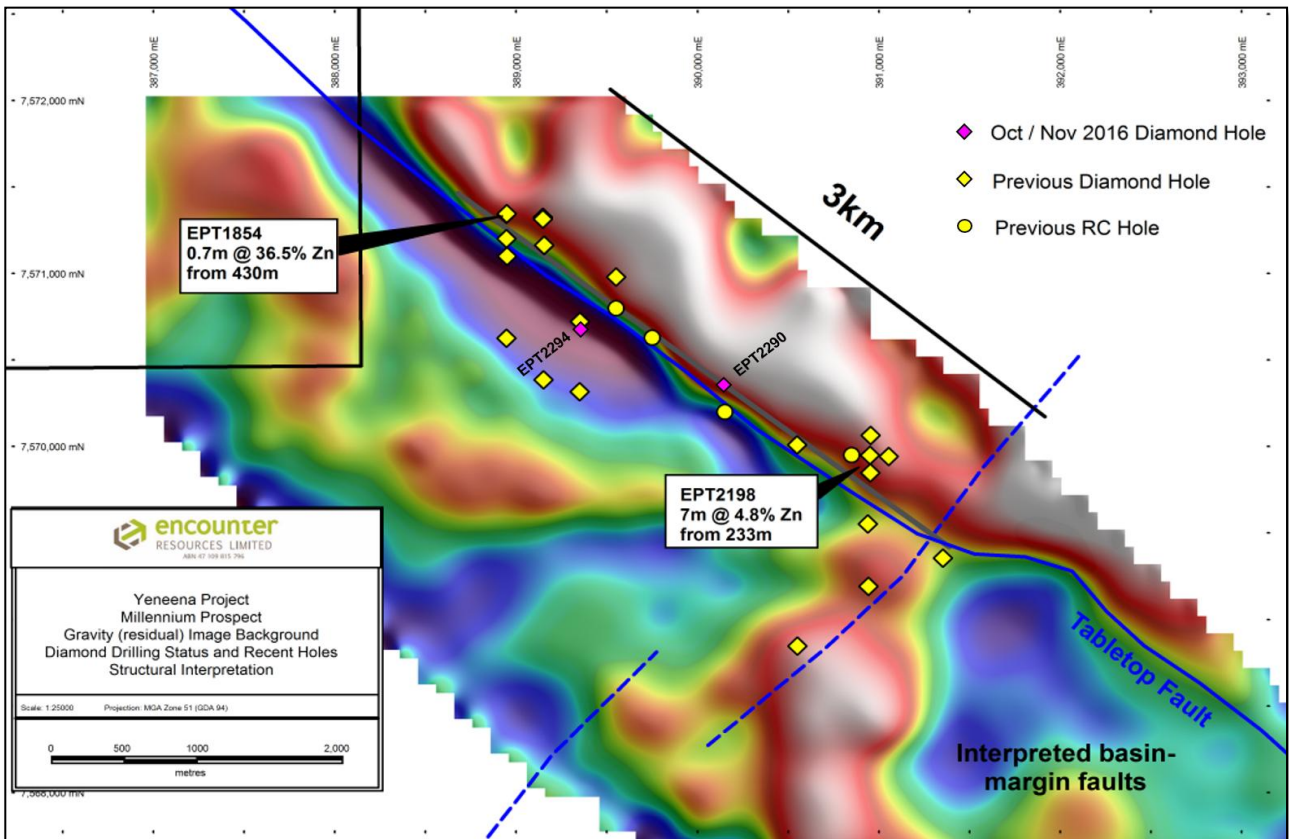

Figure 2: Drill hole collar location – Millennium

Figure 3: Drill hole long section (B – B') – Millennium Shale-Carbonate contact intersections only.

JORC Compliance

The information in this report that relates to Exploration Results is based on information compiled by Mr. Peter Bewick who is a Member of the Australasian Institute of Mining and Metallurgy. Mr. Bewick holds shares and options in and is a full time employee of Encounter Resources Limited and has sufficient experience which is relevant to the style of mineralisation under consideration to qualify as a Competent Person as defined in the 2012 Edition of the 'Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Bewick consents to the inclusion in the report of the matters based on the information compiled by him, in the form and context in which it appears. The Company confirms that it is not aware of any new information or data that materially affects the information in the relevant ASX releases and the form and context of the announcement has not materially changed. The Company confirms that the form and context in which the Competent Persons findings are presented have not been materially modified from the original market announcements.

Mining exploration entity and oil and gas exploration entity quarterly report

8. Financing facilities available <i>Add notes as necessary for an understanding of the position</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
8.1 Loan facilities	750	600
8.2 Credit standby arrangements	-	-
8.3 Other (please specify)	-	-
8.4 Include below a description of each facility above, including the lender, interest rate and whether it is secured or unsecured. If any additional facilities have been entered into or are proposed to be entered into after quarter end, include details of those facilities as well.		

The loan facility of \$750,000 is an unsecured working capital facility provided by companies associated with two directors on normal commercial terms and conditions at an interest rate of 3.5% per annum – further details are set out in the 2016 Annual Report. The facility was increased by \$100,000 during the quarter.
\$150,000 remained undrawn at quarter end.

9. Estimated cash outflows for next quarter	\$A'000
9.1 Exploration and evaluation	110
9.2 Development	-
9.3 Production	-
9.4 Staff costs	-
9.5 Administration and corporate costs (net of recoveries)	75
9.6 Other (provide details if material)	-
9.7 Total estimated cash outflows	185

10. Changes in tenements (items 2.1(b) and 2.2(b) above)	Tenement reference and location	Nature of interest	Interest at beginning of quarter	Interest at end of quarter
10.1 Interests in mining tenements and petroleum tenements lapsed, relinquished or reduced		None		
10.2 Interests in mining tenements and petroleum tenements acquired or increased		None

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
